

Habras/Radial Discs

Discs can be layered, 3 discs are the absolute minimum. Maximum of 6 discs.

Ensure they are all facing the same way and going the same direction as the diagram shows.

Habras are ideal for the Jewellery trade and other trades (Dental, Aerospace and Precision Engineering) with hard to reach areas that need deburring and polishing. They contain a mineral abrasive in the bristles, so there is no need for messy rouges or any other compound. For best results work through the grades.

**Use With;
A flexible shaft (max speed 35,000 RPM)**

Grade	Colour
80g	Yellow
220g	Red
400g	Blue
Pumice	Pink
1 micron	Light Green
6 micron	Peach

**All Grades available from our ebay shop
(WWW.STORES.EBAY.CO.UK/POLISH-IT)**
